**SOM Displays and Digital Signage**

**Summary**

The digital signage plays an important part in our ability to communicate with the community at large. The SOM Communications group controls the content of the digital displays, and IT provides the technology setup and support of them. The conference and break out rooms have both wired and wireless displays, and those are supported here as well.

<table>
<thead>
<tr>
<th>Feature</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Solstice</td>
<td>Solstice is a wireless display and screen share software. It is available on the computers located in conference rooms</td>
</tr>
<tr>
<td>Digital Signage at SOM</td>
<td>Digital Signage information screens can be found throughout the SOM public spaces. SOM Office of Communications manages the content on those displays. You can find more information on the SOM Portal here on how to request the inclusion of content.</td>
</tr>
<tr>
<td>Support for Classroom Schedule and Agenda Displays</td>
<td>The displays outside of the classrooms in Evans Hall are supported by SOM IT. Information on how to setup, and support these displays can be found here.</td>
</tr>
