# Accounts and Access

The Accounts and Access services are designed to help you get up and running with your Yale NetID, finding others through the directory, and accessing the network both on and off campus.

| ![Hand](hand.png) | **Yale NetID, Passwords & Multi-Factor Authentication**
> Your NetID and password grant access to the campus network and many University systems, such as YaleSecure wifi, VPN, and printers. Multifactor Authentication (MFA) is an additional security measure to protect your intellectual property, personal information, and Yale’s data. Learn all about these important authentication services here. |
| ![Network](network.png) | **Connecting to the Network on Campus**
> Members of the University must ensure they are connecting to Yale network resources securely. Connecting through the network, whether you are off-campus on campus, wired or wireless, requires you to select a secure solution. The services in this group will ensure you are connecting securely with all your devices. |
| ![Directory](directory.png) | **University and SOM Directories**
> The University and SOM directories will assist you in finding your colleagues and department contacts. You can find them all here. |
