# University and SOM Directories

## Summary

The SOM Information Technology Services department provides a variety of computing resources to the SOM Community. The school is equipped with a computer laboratory, email kiosks located throughout the building and networked breakout rooms. Yale SOM has a fully functional wireless environment, offering the SOM community the freedom to work, study, or meet anywhere in the building. The University and SOM directories will assist you in finding your colleagues and department contacts. The SOM Student Profile Initiative allows you to enter a brief personal bio and also provides a way for you to inform others how to pronounce your name.
