Request New Server

Summary
Once you have a consultation on bringing a new server up as part of the SOM computing landscape, the SOM IT Infrastructure team set it up based on your request. This includes base setup and configuration, including setting for security such that it is in compliance with Yale University best practices for maintaining a server or service.

Features
- Setup of an on premise or virtual server
- Base operating system installation
- Base configuration for patch management
- Base configuration for security and user authentication

Who can use it?
The service is available to the entire SOM community who has stewardship of a server.

How much does it cost?
This service is available at no charge to the Yale School of Management community.

How do I get it?

<need info on how someone would request a new server - do you use a form? Dell, John>

Related Policy and Procedures
- All users of Yale University computing and networking facilities are expected to read and abide by the Information Technology Appropriate Use Policy. For additional information, please familiarize yourself with the Policies and Procedures related to HiPAA Security.
