Integration Support for Applications

Summary

When bringing in software "off the shelf" or through the cloud, they still require access to Yale or SOM data sets or authentication/access. Our team can help get all the appropriate connections in place for use, while maintaining the security required by the University.

Features

- Allows for most applications to integrate with Yale's authentication and NetID scheme
- Connections to data sources, which are secure and meet University and SOM standards for security
- Provides compliance for data sources based on rules established by University data stewards

Who can use it?

Any member of the SOM community who is the steward of a new or existing custom application at SOM.

How much does it cost?

This service is available at no charge to the Yale School of Management community when dealing with the SOM IT staff, however, in some instances, an application integration may require professional services from the vendor, and in those cases charges may apply.

How do I get it?

Send an email to somit@yale.edu with a brief description of your request, and someone from the application team will respond.

Related Policy and Procedures

- All users of Yale University computing and networking facilities are expected to read and abide by the Information Technology Appropriate Use Policy. For additional information, please familiarize yourself with the Policies and Procedures related to HiPAA Security.
