Data Management Consulting

Summary

SOM and the data generated throughout the University is one of its most valuable assets. So creating data management policies, procedures, and processes to ensure it remains accurate, secure, accessible, and usable for analytics insights should be a top priority. Data management consulting services spans many fields such as data governance, policies, and architecture. If you need help determining the data sources you need for reporting, consult with us for assistance.

Features

- Consultation support for existing SOM and University data stores
- Knowledge of University and SOM data access governance issues, and processes
- Consultation on how to structure data and align multiple data sources to get the most out of your reporting needs

Who can use it?

This service is available to the entire SOM community doing data modeling and business intelligence functions

How much does it cost?

This service is available at no charge to the Yale School of Management community.

How do I get it?

To request assistance, contact us through eMail at somit@yale.edu

Related Policy and Procedures

- All users of Yale University computing and networking facilities are expected to read and abide by the Information Technology Appropriate Use Policy. For additional information, please familiarize yourself with the Policies and Procedures related to HiPAA Security.
