Automation Scripting Tools

Summary

Powershell and other scripting tools help us automate manually intensive processes on a daily basis.

Features

- Automation for manual processes
- Can combine a large number of steps in a single process script
- Can build in variables if needed

Who can use it?

Any SOM staff member who is managing a service.

How much does it cost?

This service is available at no charge to the Yale School of Management community.

How do I get it?

Your manager will typically grant you access to the necessary tools. Help documents for some of our tools can be found as knowledge articles here.

Related Policy and Procedures

- All users of Yale University computing and networking facilities are expected to read and abide by the Information Technology Appropriate Use Policy. For additional information, please familiarize yourself with the Policies and Procedures related to HIPAA Security.
