Hypothes.is

Summary

Hypothes.is offers a means for annotating web-based content, such as raw case studies, including highlighting text, inserting comments, and sharing annotations. While SOM IT does not explicitly support the use of this open source tool, we recognize its' prevalent use and provide some basic getting started information.

Features

- Used for annotating raw case studies
- Ability to highlight text
- Ability to insert comments
- Ability to share annotations between reviewers

Who can use it?

Any member of the Yale SOM Community can use hypothes.is.

How much does it cost?

This service is available at no charge to the Yale School of Management community.

How do I get it?

Start by creating a Hypothes.is account at https://hypothes.is/ then read through our knowledge articles to get started. Online help is available directly at https://web.hypothes.is/help/

Related Policy and Procedures

- SOM IT will provide best effort support for this application.
- All users of Yale University computing and networking facilities are expected to read and abide by the Information Technology Appropriate Use Policy. For additional information, please familiarize yourself with the Policies and Procedures related to HIPAA Security.
