Requesting access to Boomi

Dell Boomi AtomSphere® is the data integration cloud service used by SOM. Use these instructions to request access and to get started using Boomi.

Step-by-step guide

1. Send an account request to somit@yale.edu. The request will be routed to the Boomi service manager who will get your account setup. Ensure you have your eMail address listed in the request.
2. You will receive a welcome message from Dell Boomi AtomSphere® with your ID and a temporary password.
3. To log into Dell Boomi AtomSphere, visit platform.boomi.com or copy and paste https://platform.boomi.com in your browser, use the ID and temporary password to sign in.
4. You will be prompted to fill in your basic profile information and change your password.
   1. Passwords must have a minimum length of 8 characters.
   2. Password must not match commonly used passwords.
   3. Password must not be a repeated character, alpha-numeric sequence, or keyboard sequence.
5. Once you change your password, you will be automatically logged out and prompted to login again with the password you just created.
6. Once you have logged in again, you will have access to the boomi console and functions.

If you need help with Boomi or need orientation to the integration platform you can view the following resources:

- If you're new to AtomSphere, please watch this quick, "four-minute" video that shows you how to log in and helps you get started.
- Here are some useful Getting Started videos.
- If you need technical help, support options are available once you are logged into AtomSphere. Your account is entitled to standard support. For more information on Dell Boomi's support offerings, please click this link.
- To learn about how to log a support case, support best practices, and our support SLAs, please review the Dell Boomi Help and Support Guide.
