System Center Configuration Manager

Summary

System Center Configuration Manager is the University's standard application for security patching and deploying software to Windows and Apple computers owned by the University.

Features

- Keep client computers secure with little disruption to the user.
- Offer the latest features in commonly used applications
- Monitor security and compliance of end-user computers.
- Self service application portal for common software installations.

Who can use it?

This service is required on all systems owned by the University and used by Yale SOM faculty and staff.

How much does it cost?

This service is available at no charge to the Yale School of Management community.

How do I get it?

All computers owned by the University are enrolled.

Related Policy and Procedures

- All users of Yale University computing and networking facilities are expected to read and abide by the Information Technology Appropriate Use Policy. For additional information, please familiarize yourself with the Policies and Procedures related to HIPAA Security.
