Finding the Page ID of a Confluence Page

There are some Confluence plug-ins such as Jira and Insight that can use and reference confluence page. Many times instead of the URL of the page, they are looking for the Confluence page ID. This article will tell you how to find the Confluence Page ID.

Step-by-step guide

1. Open the Confluence page that for which you would like to find the Page ID.
2. From the ... menu in the top right corner, select Page Information.
3. In the URL at the top, note the 8 digit number after the pageld= text. This is the page ID. In this example the page ID is 50530331.
