Outlook configuration for Samsung S5

Use this article if you have a Samsung Galaxy S5 and want to configure it for Outlook

Step-by-step guide

NOTE: Android OS varies by manufacturer and software version; please contact the SOM Helpdesk if these instructions do not match your device.

1. Locate and tap **Settings** from the applications list. You can also arrive at Settings by pressing the menu button in the lower, left corner of your device. From the Settings icons, choose **Accounts**.

   ![Settings](image)

   NOTE: If you are RECONFIGURING you Yale account, you must Delete the existing account from your Android device at this point. Tap "Microsoft Exchange Active...", then tap "More," then "Remove Account" twice. Proceed to step 2.

2. Tap **Add account**.
3. Tap **Microsoft Exchange Activ..** (Microsoft Exchange ActiveSync)

4. Enter your **Yale E-mail address** and your **Yale NetID Password**. Tap **Next**.
5. You will see one or both of the security prompts below. You must proceed in order to configure your Yale e-mail account.

NOTE: You will read specifics regarding Remote security administration prior to activating; it is required for configuration.

**Remote security administration**

Server connect.yale.edu must be able to remotely control some security features on your device. Continue?

**Security warning**

There are problems with the security certificate for this site.

The name of the site does not match the name on the certificate.

<th>Continue</th>
</tr>
</thead>
</table>

6. Choose your account sync options. These settings are up to you. Tap **Next** when complete.
8. Read the remote security administration information. If you agree, tap **Activate**

NOTE: You will not be able to configure Yale e-mail on your Galaxy S5 or any other Android ActiveSync device without this step.
9. Provide a name for the account. This name is up to you. Tap Next.

10. Configuration is complete. Your Yale exchange account will begin to sync with your Galaxy S5.
