## Research Data & Governance

The SOM Information Technology Services department provides a variety of computing resources for research and data management to the SOM Community. The research computing committee helps SOM bring new data sets into the environment and ensures the benefit is maximized across the organization.

### Research Data at SOM

Find the list of available data at SOM for research computing.

### Wharton Research Data Services

Wharton Research Data Services (WRDS) is the leading, comprehensive, Internet-based data research service used by academic, government, non-profit institutions, and corporate firms. You will find the list of data SOM subscribes to through this service here.

### Data Governance and the Research Committee

The Research Computing Committee helps SOM bring new data sets into the environment and ensures the benefit is maximized across the organization. All requests are reviewed, and if approved, SOM IT will liaison with the data source as the steward to make it accessible. Find the process documented here.
