## Media Add-On Support

### Summary

The SOM Information Technology Services department provides a Desktops and Laptops Service to the SOM community. The Media services offerings include support for a variety of live conference formats to support the full continuum of conference and broadcast needs. When one of your events call for Translation technology, or you expect an event to overflow, or simply need background music during an event opening, we have those additional supporting offerings here.

<table>
<thead>
<tr>
<th>Translation Technology Support</th>
<th>Media services can support translation during conferences if needed, and it supports a wide array of languages.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Background Music Only</td>
<td>If an event requires some background music during a portion of an event (networking sessions, or music over dinner) Media services can help create the right ambiance for your event</td>
</tr>
<tr>
<td>Event Overflow</td>
<td>We understand that sometimes a scheduled event will be popular, and in order to allow more of our constituents the ability to view an event, we can support planned overflow to a number of set locations.</td>
</tr>
<tr>
<td>Media Specialty Editing</td>
<td>Media Services provides specialty editing support. Media Services does not provide general video editing services</td>
</tr>
</tbody>
</table>
