Analytic Solver Platform Crashes Excel upon Cell double-click

When double clicking a cell in Excel with Analytic Solver Platform V2015 version 15.0.3, Excel immediately crashes. The user can single click a cell and enter data using the keyboard or the function bar. This does not affect all clients, the only known clients affected are those with Dell Latitude 6430u Windows 8, Office 2013 program laptops.

Information

The solution is to Upgrade to version 15.0.4

1. Get the appropriate architecture version from \polaris\Software\Analytic_Solver_V2015
2. Follow on screen prompts to complete the upgrade
