Step-by-step guide

How to Connect to YaleSecure Wireless Network in Windows

1. In the taskbar, near the time, click the wireless icon.

2. You'll see a list of available networks. Click YaleSecure.

3. Be sure that Connect automatically is checked, and then click Connect.
4. **NOTE**: Depending on your computer configuration, you may or may not have to perform this step. If you are not prompted for username and password, then move to step 5.

Enter *username*: `yale\YourYaleNetID` (Example: `yale\abc12`) and your *Yale NetID password*, and then click **OK**.

5. You'll be notified that "Windows can't verify the server's identity"; click **Connect**.
6. If the connection is successful, Connected will be listed to the right of YaleSecure.
