Hopper Compatibility

Hopper, named after Grace Hopper ’34 Ph.D., is a custom version of Blackbaud Enterprise CRM (constituent relationship management), mixed with a range of technologies for events, social media, online giving, marketing, stewardship, planned giving, matching gifts, gift processing, and other areas. There are some compatibility issues you should be aware of when using Hopper.

Information

Hopper is compatible with Chrome, Firefox, and Internet Explorer.

Microsoft Edge isn't compatible and causes the Hopper webpage to loop and not get to the login screen.

Chris Losi, Manager for Development and Alumni Relations Office, handles all access new employees.
