Course Auction: Access Issues

Access to the course auction is set by an active directory group and by a local profile in the auction. SOM IT is responsible for adding the incoming class groups into the auction security group each year. AASL is responsible for creating the student auction profiles.

Step-by-step guide

1. Verify that affected userID is in the Yale\GSR Users AD Group, correctly configured students will be in a program group that will roll up into it.

   CN=SOM GSR Users,OU=SOM GSR,OU=SOM Web App Access,OU=School of Management,DC=yu,DC=yale,DC=edu

2. Contact AASL to verify the student has an account in Auction System.
3. AASL will create user account.
