Yale Secure Wireless (Wifi)

Summary

YaleSecure is the recommended, encrypted wifi network for anyone with a Yale NetID. To use YaleSecure, enter your NetID and password when prompted.

Features

- Secure access to the Yale Network
- Associates your device with your NetID as required by University Information Security
- Is available in nearly all University locations

Who can use it?

Any member of the Yale community with a NetID and password

How much does it cost?

This service is available at no charge to the Yale community.

How do I get it?

Use your device to search for Wifi networks, and look for the Wifi signal broadcasting the SSID "YaleSecure". Connect and use your Yale NetID and password to authenticate.

Related Policy and Procedures

- Problems with campus network connections should be reported to the central ITS Help Desk at 203-432-9000. SOM IT provides best effort support only for central services.
- All users of Yale University computing and networking facilities are expected to read and abide by the Information Technology Appropriate Use Policy. For additional information, please familiarize yourself with the Policies and Procedures related to HIPAA Security.
