Remote Desktop Connection on a Mac

Remote Desktop Connection (RDC) allows you to connect to a desktop computer located on the University network, from a computer that is located on the internet, but not at the University network. This allows you to access all the software and files located on your office computer as if you were there.

Step by Step Guide

Remote Desktop Connection (RDC) on your Mac:

1. RDC on a Mac:
   a. Go to the App Store and search for Microsoft Remote Desktop 10.
   b. Click GET then INSTALL APP to download Microsoft Remote Desktop 10
   c. You will have to enter your AppleID password to complete the installation.
   d. Open your MacOS Finder and navigate to the Applications Folder, and to the Microsoft Remote Desktop folder:
   e. Double click the Microsoft Remote Desktop application.
   f. Click Add PC.
g. Type the Full Computer Name (Dxxxxxxx.som.yale.internal) of the host pc and in the PC Name field and click Add.

h. Example of Full Computer Name:

i. Double-click the profile you just saved. This will connect you to your Windows computer's logon screen.
j. Logon using yale\NetID and Password then click Continue.

k. Click Continue.

l. You are now logged into your Windows computer.
