How to Update your Zoom client on a Mac

Zoom is updated regularly as security vulnerabilities are identified. Use these instructions to ensure you have the latest version of zoom installed on your Mac OS computer.

Step-by-step guide

These instructions apply to the zoom application if it is installed directly on your Macintosh computer. It does not apply to your mobile device, as mobile devices have native update capability.

1. Launch your zoom client.
2. In the top menu bar, you should see zoom.us as the first menu option. Select the “Check for Updates...” option from the menu.

3. A window will be displayed showing you the version of zoom you are running, and will inform you if there is a later version available.
4. Select Update to install the newest version of zoom.
