Poll Everywhere for Slack

Use these steps to run a poll using Poll Everywhere from Slack.

Step-by-step guide

1. Request a Yale University Poll Everywhere account from medialibrary@yale.edu
   They will generate an invitation to your Yale email. If you already have an account attached to the University, proceed to step 3.
2. Accept the invitation to attach your account to the Yale University site license.
3. Sign in to Poll Everywhere using your Yale email address at: https://www.polleverywhere.com/login
4. Navigate to https://www.polleverywhere.com/app/slack then click "Add to Slack"
5. Ensure the appropriate workspace is selected in the top right of the page, review the permission scopes then click "Allow."

6. Once installed, go back to Slack.
7. Use the Slack shortcuts button to find and select Create and publish poll with Poll Everywhere
8. Select poll type. In most cases this will be multiple choice.

Multiple choice
Ask a question and let participants choose from a list of answers.

Choose

Question and answer
Participants respond to a question, then can upvote and downvote other answers.

Choose

9. Add the question and options. Determine if more than 1 response per person is allowed then click Create.

New multiple choice
Ask a question and let participants choose from a list of answers.

Will you use PoliEv in Slack

Options
Yes
No

Remove option + Add option

Number of responses per person
1

Back Create
10. Select the channel to publish the poll. Then click **Publish**. This will deliver the poll.

Example:

*Poll Everywhere*  
**Will you use PollEv in Slack?**

Create your own polls with `/pollev`

11. The creator of the poll may view result in their account at any time: [https://www.polleverywhere.com/activities](https://www.polleverywhere.com/activities)

Quick results can be viewed by clicking the Poll name from Slack.
