Media Library

Summary

Media library is Yale's implementation of Panopto, a media management and video capture platform. All media files are saved securely on and served from the Panopto servers, via Amazon web services.

Features

- The Media Library tool is designed to enable instructors, TFS or project site maintainers to upload audio and video files that will be streamed to students and other participants in their Canvas course or project sites.
- The tool enables these users to record lectures, create video assignments, and organize content in folders for individual or departmental use.
- Instructions on how to use the tool can be found at the Canvas Yale help site.
